

- High-speed connectivity with four-port gigabit switch and 11n single radio/11ac dual radio access point
- Advanced security features like stateful packet inspection (SPI) firewall, URL/MAC/IP/content filters, and denial of service (DoS) attack protection
- VPN initiation and termination (IPsec, L2TP, PPTP) for secure data transfers
- Built-in HP ProLiant Server Management dashboard
- Purpose-built enclosure allows for physical stacking on HP ProLiant MicroServer Gen8

The all-in-one HP PS110 Wireless VPN Router Series delivers secure high-performance Internet access and wired/wireless connectivity for offices and remote/mobile employees. Part of the HP OfficeConnect portfolio, the routers feature the next-generation HP Networking user interface and Easy Setup Wizard that are designed for simplicity and reliability to get your business connected quickly. The HP PS110 routers are specifically designed to work with your HP ProLiant servers with unique management integration with the iLO interface. In addition, the enclosure is custom designed to physically stack on top of the HP ProLiant MicroServer Gen8.

The router includes a SPI firewall, and enterprise-grade VPN technology, combined with wireless encryption features like WPA/WPA2 encryption for secure data transfer.

Advanced security features like IEEE 802.1x, URL filters, content filters, MAC filters, and Trusted Users Management keep your network safe from outside threats and unwanted access. Time based rules that enable scheduling rules for radios and security filters combined with email alerts simplify management tasks for users.

With a compact design featuring internal antennas, the routers are ideal for stacking on the MicroServer Gen 8 Server.

## Features and benefits

### Wireless features

- IEEE 802.11 a/b/g/n compliance

Unit has built-in single radio dual band IEEE 802.11a/b/g/n compliant access point

- MIMO

Unit supports 3x3 MIMO antennas to ensure wider wireless coverage and superior throughput

- Multiple SSIDs

Radio supports up to four SSIDs to help segregate wireless clients and apply granular policies

- WMM (IEEE 802.11e)

Provides Quality of Service (QoS) to wireless clients based on access categories like voice, video, best effort, and background

- WMM-Power Save

WMM-Power Save mode helps reduce power consumption on wireless network

- Wireless distribution system (WDS)

Allows users to expand wireless coverage without the requirement for a wired connection. HP PS110 and/or HP R100 series routers can be linked together via the wireless medium (using SSIDs), while at the same time servicing clients in the vicinity of each router

- Wi-Fi protected setup (WPS v2)

WPS v2 protocol allows customers to easily create secure wireless link between wireless client devices that support WPSv2 and the router

- SSID to VLAN mapping

Allows user to segregate wireless traffic

### Security

- SPI

Enforces firewall policies to control traffic and filter access to network services; maintains session information for every connection passing through it, enabling the firewall to control packets based on existing sessions

- URL filtering

Blocks unsafe websites and protects network based on URL information

- Content filtering

Blocks websites and protects network based on keyword match done on the content in the webpage

- Network access control

MAC address and IP address based network access control.

- IEEE 802.1x authentication and RADIUS login

Authenticate wireless clients based on 802.1x protocol using RADIUS server

- DoS prevention

Detects and blocks commonly used DoS attacks that can be initiated on the devices. Common attack signatures are stored in the device

- Application level gateway (SIP/ H.323)

Discovers the IP address and service port information embedded in the application data using deep packet inspection in the firewall; firewall then dynamically opens appropriate connections for specific applications

- Secure management

MAC/IP based administrator authentication, secure WAN/LAN access to management interface, encrypt management traffic using HTTPS

- HTTPS management

Provides secure Web management

- Management password

Provides security so that only authorized access to the Web browser interface is allowed

### **Virtual private network (VPN)**

- IPsec

Provides secure tunneling over an untrusted network such as the Internet or a wireless network; offers data confidentiality, authenticity, and integrity between two network endpoints

- Layer 2 Tunneling Protocol (L2TP)

An industry standard-based traffic encapsulation mechanism supported by many common OSs; will tunnel the point-to-point Protocol (PPP) traffic over the IP and non-IP networks; may use the IP/UDP transport mechanism in IP networks

- Network Address Translation-Traversal (NAT-T)

Enables IPsec-protected IP datagrams to pass through a network address translator (NAT)

- Point-to-Point Tunneling Protocol

An industry standard-based traffic encapsulation mechanism for VPN tunnels supported by many common OSs; PPTP uses a control channel over TCP and a GRE tunnel operating to encapsulate PPP packets

- Site-to-Site VPN Tunnel

Configures VPN gateways on routers to provide secure site-to-site communication between offices, partners, or remote workers; tunnels can be set using IPsec, PPTP or L2TP over IPsec protocols

- Client Mode VPN Tunnel

Supports native VPN client based on Windows® and MAC OS

- VPN pass through

Supports VPN pass through of PPTP, L2TP, and IPSec tunnels

## **Management**

- HP ProLiant Server Dashboard

Enables auto-detection of HP ProLiant servers connected on the network followed by real-time updates of Active health status for the monitored servers

- Network Time Protocol (NTP)

Synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time

- Secure Web GUI

Provides a secure, easy-to-use graphical interface for configuring the module via HTTPS

- Event logging

Supports local logging as well as remote Syslog server

- Email alerts

Device can be configured to send email alerts to preconfigured email address

- USB support

Supports file transfer from compatible USB devices. Supports Samba and FTP server

- SNMP v1, v2c

Supports limited SNMP management capability

- Firmware upgrade

Supports firmware upgrade via HTTP/HTTPS. Also supports configuration file import/export through Web interface

- Traffic statistics

Monitor traffic statistics on device interfaces, SSID, and client level

- Tools

Troubleshooting tools, such as tech file generation, ping, trace-route, NSlookup, etc.

- Time-based rules

Simplifies network management by setting time-based rules on device features, such as wireless radio, security filters, etc.

### **Layer 2 switching**

- Internet Group Management Protocol (IGMP) and Multicast Listener Discovery (MLD) protocol snooping

Controls and manages the flooding of multicast packets in a Layer 2 network

- IEEE 802.1D Spanning Tree Protocol (IEEE 802.1D)

Provides redundant links while preventing network loops

- IEEE 802.1w Rapid Convergence Spanning Tree Protocol

Increases network uptime through faster recovery from failed links

- Auto MDI/MDI-X

Provides automatic adjustments for straight-through or crossover cables on all 10/100/1000 ports

- VLAN (IEEE 802.1Q)

Supports one tagged VLAN per LAN port. Helps segregate traffic on LAN ports to virtual groups

### **Layer 3 services**

- Address Resolution Protocol (ARP)

Determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network

- Dynamic Host Configuration Protocol (DHCP)

Simplifies the management of large IP networks and supports client and server; DHCP Relay enables DHCP operation across subnets

- IPv6

Dual stack (IPv4/IPv6): transitions from IPv4 to IPv6, supporting connectivity for both protocols-MLD snooping: forwards IPv6 multicast traffic to the appropriate interface, preventing traffic flooding-IPv6 ready: switch hardware can support IPv6 routing

- Network Address Translation (NAT) and Port Address Translation (PAT)

Preserves a network's IP address pool or conceals the private address of network resources such as Web servers, which are made accessible to users of a guest or public wireless LAN; provides choice of dynamic or static translation

- DHCP server

Multi-scope DHCP server hands out IPv4 and/or IPv6 addresses to client devices

- DMZ support

Allows users to open a local client for unrestricted two way access, especially if that client cannot run an Internet application properly from behind the NAT firewall

- Dynamic DNS (DDNS)

Supports DDNS feature that allows customers to access a dynamic address with a fixed domain name

### **Layer 3 routing**

- Static routes

Ability to manually configure IPv4 and IPv6 routes

- RIP v1, v2, ng

Dynamically routes IPv4 and IPv6 packet between different subnets using RIP protocol

### **QoS**

- Traffic Prioritization (DSCP)

Prioritizes traffic based on Layer 3 header in IP packets. Helps prioritize time-sensitive traffic like voice and video

- Traffic Prioritization (IEEE 802.1p)

Traffic prioritization based on Layer 2 packet headers. Allows real time traffic like voice and video to be prioritized

- IEEE 802.11e

IEEE 802.11e Wi-Fi Multimedia (WMM) wireless QoS standard—when combined with wired QoS policies—provides end-to-end QoS, delivering different wireless channel competitiveness for different services.

- Queue

Device capable of segregating traffic into four priority queue to enable more granular traffic prioritization. This enables consistent performance for high priority traffic, even during periods of network congestion

- Traffic shaping

Enable configuration of bandwidth limit to traffic per queue

- Traffic remarking

Allows remarking of 802.1p and DSCP traffic priority

- Queue mapping

Allows mapping of traffic to queue based on MAC address, IP address, traffic type, and certain commonly used services

**Ease of use**

- MicroServer mounting

Purpose-built enclosure allows for physical stacking on HP ProLiant MicroServer Gen8

- Aesthetics

Embedded antennas expand installation options and increase aesthetics

- Easy to use

GUI-driven central management and configuration

- Fanless design

Enables quiet operation for deployment in open spaces

- Flexible mounting

Supports desktop as well as wall mount operation

**Warranty and support**

- 3-year Warranty 2.0

Advance hardware replacement with next-business-day delivery (available in most countries).

- Electronic and telephone support (for Warranty 2.0)

Limited electronic and 24x7 telephone support is available from HP for the entire warranty period; to reach our support centers, refer to [hp.com/networking/contact-support](http://hp.com/networking/contact-support); for details on the duration of support provided with your product purchase, refer to [hp.com/networking/warrantysummary](http://hp.com/networking/warrantysummary).

- Software releases

To find software for your product, refer to [hp.com/networking/support](http://hp.com/networking/support); for details on the software releases available with your product purchase, refer to [hp.com/networking/warrantysummary](http://hp.com/networking/warrantysummary).

## HP PS110 Wireless VPN Router Series

### Specifications

	HP PS110 Wireless 802.11n VPN AM Router (JL065A)	HP PS110 Wireless 802.11n VPN WW Router (JL066A)
<b>I/O ports and slots</b>	1 RJ-45 autosensing 10/100/1000 WAN port 4 RJ-45 autosensing 10/100/1000 LAN ports	1 RJ-45 autosensing 10/100/1000 WAN port 4 RJ-45 autosensing 10/100/1000 LAN ports
<b>AP characteristics</b>		
Radios (built-in)	802.11a/b/g/n	802.11a/b/g/n
Radio operation modes	Client access, Client bridge	Client access, Client bridge
AP operation modes	Autonomous	Autonomous
Wi-Fi Alliance Certification	a/b/g/n Wi-Fi Certified	a/b/g/n Wi-Fi Certified
<b>Physical characteristics</b>		
Dimensions	9.06(w) x 9.33(d) x 1.67(h) in (23 x 23.7 x 4.25 cm)	9.06(w) x 9.33(d) x 1.67(h) in (23 x 23.7 x 4.25 cm)
Weight	2.2 lb (1 kg)	2.2 lb (1 kg)
<b>Memory and processor</b>	MIPS @ 700 MHz, 128 MB NAND flash	MIPS @ 700 MHz, 128 MB NAND flash
<b>Mounting and enclosure</b>	MicroServer Gen8 mount/ Desktop/wall-mount	Desktop/wall-mount
<b>Performance</b>		
MAC address table size	2048 entries	2048 entries
VPN throughput	upto 30Mbps	upto 30Mbps
Dedicated IPsec VPN tunnels	5	5
Network throughput	920Mbps (NAT)	920Mbps (NAT)
Concurrent sessions	5	5
Number of VLANs	4	4
<b>Environment</b>		
Operating temperature	32°F to 104°F (0°C to 40°C)	32°F to 104°F (0°C to 40°C)
Operating relative humidity	5% to 95%, noncondensing	5% to 95%, noncondensing
Nonoperating/Storage temperature	-40°F to 158°F (-40°C to 70°C)	-40°F to 158°F (-40°C to 70°C)
Altitude	up to 10,000 ft (3 km)	up to 10,000 ft (3 km)
Notes	No Fan	No Fan
<b>Electrical characteristics</b>		
AC voltage	100 - 240 VAC	100 - 240 VAC
Maximum power rating	9.5 W	9.5 W
Notes	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. 12 VDC power adaptor	Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. 12 VDC power adaptor
<b>Reliability</b>		
MTBF (years)	51.54	51.54
<b>Safety</b>	UL 60950-1; EN 60950-1; CAN/CSA-C22.2 No. 60950-1	UL 60950-1; CAN/CSA 22.2 No. 60950-1; EN 60950-1
